OBJECTIVE

Recently graduated computer science student seeking an engaging internship or entry level position to expand my experience and knowledge in the field of computer science.

EXPERIENCE

Industry-Sponsored Capstone Project - SanDisk

Aug 2025 – Apr 2026

SanDisk & Northern Arizona University

Flagstaff, AZ

- Designed and implemented a Rust-based testing framework for NVMe SSDs.
- Used formal methods (TLA+, TLC) to specify NVMe behavior and generate test sequences.
- Wrote a Rust execution engine to translate and run test sequences on real NVMe drives.
- Produced professional well-documented code for internal use by SanDisk engineers.

PROJECTS

NYT RPG | Typescript, Golang, SQLite

- Web based real time RPG with New York Times games using WebSockets and a RESTful API.
- Implemented concurrent Websocket connections for live gameplay features.
- Built a REST API to handle user authentication and various other features.
- Containerized with Docker for easy deployment.

VI | Rust

- Vi text editor clone. Compiles to WebAssembly to be used on the web.
- Gap Buffer implementation for efficient text manipulation.
